

Kamen
Karchev

Full-Stack
Software Engineer

ABOUT ME

Curious and self-motivated. **Creative** from an early age, I was drawn to software engineering — where an idea becomes real with a few lines of code and one or two cups of **coffee**. My skills don't vanish when I close the IDE: from building a **YouTube channel** to working in the event & wedding industry, I've assembled a wide skillset that makes me adaptable to any situation. That doesn't mean I've stopped learning — I'm excited to keep growing and working on my career.

EXPERIENCE

Software Engineering Intern

Quanterall JUL 2022 – FEB 2023

Introduction to **Kotlin**, deep dive into **Erlang** then **Elixir**. Built a **chat service** inspired by **Discord** in **Elixir**, and a **graph path-finding program** in **Erlang**.

Network Infrastructure Intern

Asparuhovo Net MAY – APRIL 2025

Worked in a real ISP environment **with infrastructure**, protocols and hardware. Modelled a business network in Cisco Packet Tracer.

Event Crew

Vermont Tent Company 2023, 2024, 2025

Three seasons in the USA with cross-cultural teamwork in English. Learned what it's like to be responsible for crew and company assets. Had my longest shift at around 13 hours.

HIGHLIGHTS

YouTube Channel

CONTENT CREATION · SEO · ADOBE

2024

Built a YouTube channel. Best video, on AI, gained **200,000+ views**.

History Interactive

PHOENIX · REST API · SVG · REDIS

2026

Interactive platform for a real YouTuber's (not me) community.

Microservice backend with caching, focused on efficiency. Frontend focused on territory geometry. **Deployed and accessible** in beta!

DopeyUserAPI

OAUTH · DOCKER · PROMETHEUS · GRAFANA

2026

Scalable user-management service. Wanted to build it as close to **production standards** as possible. Used in History Interactive! Can send **real emails**, **login via Google/GitHub** and more.

EPITA Summer School

LLM · MCP · RAG

2026

International summer school in Paris. Math, prompt engineering, **RAG** and **MCP servers** and a business visits. Team assignment making an "AI Event Organisation App".

Student Science Session

SOFT-SKILLS · CYBERSECURITY

2026

Co-authored a paper on team management and crisis prevention in cybersecurity. Presented in front of a **university jury!**

Winery Operations

JAVA · SPRING · HIBERNATE

2025

Multi-role platform for order, inventory and task management in a winery. Team project focused on **software architecture**, **SOLID OOP** and **design patterns**. Experience with **version control** cooperation.
